APPLICATIONS**

IMPORTANT INSTRUCTION

ENVIRONMENT

Lead, a major component in your battery, is one of the most valuable metals in the world, serving plentiful needs. However, Lead, like many good things in the world, if not handled responsibly, can harm the environment and our health. Hence Act responsibly. Do ensure to return your used battery to our authorized dealers only helping you to recycle them and preventing it from falling in wrong hands.

CAUTION

1. Keep away from Sparks, Cigarettes, open flame, these can cause explosions.
2. Avoid metallic contact across terminals, as it can result in short circuits & sparking.
3. It is strongly recommended not to use any additives or dopes.
4. Keep it out of reach of children.

SAFETY

Drops of acid on clothing: Treat with water, rinse it with plenty of water before drying.
Drops of acid in the eyes: Rinse continuously for about 5 minutes in clean

NOTE

1. As per batteries (management and handling) rules, 2001, it shall be the responsibility of the consumer to ensure that used batteries are not disposed of in any manner other than depositing with the authorized dealer.
2. For all fitments, please refer company's application guide.
3. Battery comes with factory charged condition & need not be initially charged
4. Battery must be serviced/checked by the nearest dealer once in 6 months for maintenance free batteries and once in 3 months for normal batteries.
5. Warranty against manufacturing defect only comes under liability of the company.

WARRANTY CONDITIONS

This warranty is limited to manufacturing goods defect arising only from poor workmanship other use of faulty material, consequential liabilities with the dealer, duly producing warranty card & cash memo.

INSTALLATION & MAINTENANCE

Ensure the cable clamps fit tightly and properly on to the terminals connecting cables should be adequate capacity and long enough to prevents training of battery terminals. Apply petroleum jelly externally over the terminals after clamping to avoid corrosion. Battery top should be kept clean dry.
Vent plugs should be kept light & clean.

Check the electrolyte level once in three months, add distilled water to 15mm. Above the Separator height. Avoid installing a lower ampere hour battery. On installations the voltage across the battery terminals should not be less than 12.40.

Lead acid batteries contain lead & sulphuric acid which are highly toxic and extremely hazardous for health and environment.

Lead poisoning affects the central nervous system causing irreversible retardation and subsequent death. Unauthorized smelters tend to pollute the air and ground water with these toxic substances during smelting. To safeguard society, the government of India has notified as under.

It shall be the responsibility of the consumer to ensure that used batteries are not disposed of in any manner other than depositing with the dealer, manufacturer, reconditioner or at the designated collections centers" hence, please do not discard the battery in a trash his or give/sale to an unauthorized persons. It is mandatory for our authorized dealers to accept a used battery and provide corresponding rebate on purchase of new battery, please not that violations of these guidelines may lead to legal action/prosecution by government authorities.

TERMS & CONDITION

1. The tear off portion of warranty card to be handed over to the Jupiterus authorized dealer for registration of warranty within 7 days from the date of sale/installation duty filled in all respect by the dealer/consumer
2. Jupiterus batteries are warranted against all manufacturing detects only, consequential liabilities will not be entertained however, reduction in backup time is not a manufacturing defect and is caused due to usage conditions. Hence, battery cannot be replaced for low backup time
3. The service record on the warranty card must be filled in regularly as a proof of specified maintenance. Failure to do so will be invalidate the warranty.
4. The completely filled warranty card along with a copy of cash memo/bill must accompany at claims arising within the warranty period. Tempering or over writing of battery serial number on warranty card will invalidate this battery claims.
5. In the event of any complaint. The battery must be returned with complete electrolyte. Unlamped & should be submitted to the nearest authorized Jupiterus dealer for battery adjudication.
6. The right to determine whether the Battery needs repair, rectification, free replacement rests with the Company
7. The defective battery is being replaced, will become the property of the company and no scrap rebate will be given for it. The warranty period on the battery being repaired/replaced free of charges shall commence from the date of sale of the original as stated and not from the day it is repaired/replaced.
8. Recharging is not covered under this warranty and shall be charged extra. Any octroi duty or local taxes applicable on the battery under repair or replacement shall be borne by the consumer.
9. The warranty shall not cover battery failure resulting from deep discharge, overcharging, physical damage, or improper topping up.
10. All liabilities under this warranty shall cease if the battery is transferred to any third party.
11. All liabilities under this warranty shall cease if the battery is used for any application other than those specified in the company's application chart.
12. The warranty shall not be applicable in case of any damaged, bulged, burst, worn-out, or burnt battery.
13. If the inverter lower cut-off is not functioning properly or has been tampered with, the battery may become deeply discharged during severe power cuts. A lead-acid battery cannot be revived once it is deeply discharged; therefore, a deeply discharged battery shall not be accepted under warranty.
14. If the damage to the battery caused by accident. Fire, faulty electrical system, improper handling, terminal damage, servicing of the battery by an unauthorized dealer and incomplete service record on warranty card, then the warranty will be nullified,
15. In the event of any particular battery model being phased out or non-availability the company reserves the right to pro-rata settlement of the warranty, no price differential will be paid or received.
16. Consumer is deemed to have read, understood and agreed to these conditions at the time of purchase.
17. Explosion does not come in the purview of warranty; company Will not be responsible for any loss or injury caused to the property or any persons due to any crack or explosion in the battery.
18. Warranty will stand cancelled if the battery is fitted in non-recommended applications all fitments should be as per company's application chart for the validity of the warranty.
